PROFESSIONAL SUMMARY

2026 B.E. graduate in AI & Machine Learning (CGPA 8.4, No Backlogs) with strong foundations in object-oriented design, data structures, and algorithm problem-solving. Built and deployed three scalable, AI-integrated web applications using Python, JavaScript, and REST APIs. Completed three technical internships. Passionate about building high-quality software at scale and working in fast-paced, customer-obsessed engineering environments.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL
Data Structures & Algorithms: Arrays, Strings, HashMaps, Linked Lists, Trees, Sorting, Searching
OOP & Design: Object-Oriented Design, Modular Architecture, REST API Design
Full-Stack: React.js, Next.js, Node.js, Express.js, FastAPI, HTML5, CSS3
Databases: MongoDB, PostgreSQL, Relational & NoSQL Database Design
Tools & Platforms: Git, GitHub, Linux, Agile/Scrum, CI/CD Basics
Cloud: AWS (Basics), Docker (Basics), Render, Vercel
AI / ML: Google Gemini API, LLM Integration, Generative AI, Prompt Engineering, Scikit-learn, PyTorch

WORK EXPERIENCE

- Data Analyst Intern — DMS Computers and Technology** *Jan 2025 – Feb 2025*
- Analyzed Zoho's competitor SaaS datasets using Python and Excel, identifying application-level feature and infrastructure gaps to inform product strategy.
 - Presented data-driven visual reports to a 3-member founding team, directly shaping product roadmap decisions.
- Web Developer Intern — Code Casa** *Oct 2023 – Dec 2023*
- Independently designed, developed, and deployed a full-stack MERN web application from requirements to production within a 4-week timeline.
- Web Developer Intern — Sumago Infotech Pvt. Ltd.** *Jul 2022 – Aug 2022*
- Collaborated in a 4-member Agile team to design and build a web application using HTML, CSS, JavaScript, Python, and PHP.

PROJECTS

- CodeView — AI Code Evaluation Platform** [\[Github Link\]](#) *Nov 2025 – Dec 2025*
- Architected and built an LLM-integrated code evaluation system using Next.js and FastAPI; designed REST API endpoints connecting front-end, LLM services, and database layer, reducing manual review time by 70%.
- Emotica AI — Real-Time Chatbot System** [\[Github Link\]](#) *Jul 2025 – June 2026*
- Developed the Python backend, WebSocket communication layer, and LLM API integration for a real-time emotion-aware chatbot supporting asynchronous voice interactions.
- Quickies AI — Modular Productivity Platform** [\[Github Link\]](#) *Dec 2025 – Feb 2026*
- Built a modular AI platform using React and FastAPI, integrating four LLM-powered services through scalable REST APIs with an extensible architecture.

EDUCATION

- BE — Artificial Intelligence & Machine Learning, LoGMIEER, Nashik** *2023 – Jul 2026*
CGPA: 8.4 | No Active Backlogs
- Diploma in Computer Engineering, Government Polytechnic, Vikramgad** *2020 – 2023*
Score: 80.29%

CERTIFICATIONS & COMMUNITY

Certifications: Google Prompt Design in Vertex AI (2025), Coursera Deep Learning with PyTorch (2025), Deloitte Data Analytics (2025), TensorFlow Generative AI (2024)

Community: GDG Nashik Member, GirlScript Summer of Code Contributor, Attended Google I/O 2025, Attended AWS Summit Mumbai, Participated in Adobe & Google Exchange Hackathons
